

Account Medical LLC
PERSONAL MEDICAL INFORMATION SYSTEMS

"On Demand" by Account Medical is new technology geared for the safety of staff and students of any age!

Let's face it, accidents can and do happen and they create chaos and a dangerous surrounding.

The first and best response for any emergency is to dial 911.

"On Demand" by Account Medical is setting the bar on the electronic medical records industry! Our goal is to unify the medical records system in each of our schools across the country!

Imagine, after calling 911, tap on the "On Demand" app and view your facility's "On Demand" company home page. See a list of your students (or staff) and the QR Code next to their name. Tap on that QR Code and immediately view that person's medical profile.

How is that for simplicity? You can also text this information to First Responders.

Now, you can take the correct active measures depending on their alerts or conditions or quickly contact their loved ones on the spot!

Now that's cool stuff!

To learn more about the benefits of this new program and technology, visit us at: <https://accountmedical.com> and click on the HOW "ON DEMAND" WORKS tab. There you can view a sample home page with interactive QR Codes. Tap on one of those QR Codes and view what a personal medical profile looks like.

Whether a small or large education facility, our "On Demand" system will definitely help to protect children of all ages. Be prepared.

Technology is rapidly changing, so "let's put smart to work" with our "On Demand" safety program. Order today! Register your company or institution to begin!
